German

Projects

2026

Global Blood Bank

- Developed Global Blood Bank Cloud Network
- A cloud-based platform connecting hospitals, donors, and blood banks for real-time blood availability, reducing emergency shortages (SDG 3, 9).

Real Time Public Transport Tracking System

- Developed a Real-Time Public Transport Tracking System for small cities, improving commute reliability by enabling live bus tracking and reducing delays and overcrowding.
- Designed a low-bandwidth optimized solution to improve commuter experience, reduce delays, and support sustainable urban transport.

Core Concepts

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- DBMS
- Computer Networks
